Based Businesses: Derrick Schmidt Aviation, K&D Aviation and Grand Aces

Primary Customer/User Base: Although the based aircraft make up a large user-base for the airport, the Grand Lake area serves as a top recreational destination in the state and the airport provides access to this.

Community Impact: The airport's ability to connect people to the community provides for economic impact in retail sales, employment and real estate sales.

Needed Capital Projects: A parallel taxiway to go with the new runway.

From a cow pasture to a jet capable runway with 100% volunteers and zero funding from the sponsor, SGLR is a true "grass-roots" success story for our state.
